### **Davis-Standard, LLC Readies to Showcase Expertise at NPE**

(Pawcatuck, Conn.)--Davis-Standard, LLC will promote extrusion and converting technology across all product lines at **booth #5945** during NPE 2012 in Orlando, Fla. A variety of equipment will be on display as well as information about new products and services geared toward energy efficiency, product versatility and maximum productivity. The exhibit will feature examples of premium converting and extrusion technology, including new extruders, improved components and innovative systems. Following are highlights from Davis-Standard's extensive product line that will be at the show.

- A **running geothermal HDPE pipe extrusion system** for producing PE 100 geothermal pipe.
- A **running compact HPE-H extruder** with a direct drive AC vector motor with fully integrated **KXE-I808C inspection system** for continuous flat film and sheet.
- New three-layer blown film **Vertex die technology** with improved internal bubble cooling (IBC).
- New **energy efficient heating/cooling system** available for both new machines and retrofitting to existing equipment.
- New **direct drive medical extruder** with interchangeable barrel assemblies.
- New slimline **MAC extruder** design for nine-layer extruder arrangements.
- A 75mm (3-inch) **Thermatic® HS high-speed extruder** for increased outputs and performance.
- **PS foam die, foam die cooling and sizing mandrel, and motorized cooling cart.**
- **DSB®-2 feedscrew** for LLDPE, mLLDPE, LDPE, EVA and POP resins.
