

# Accuchiller TSE Series

## Packaged Outdoor Chiller with Integral Tank

### Benefits:

- **Refrigerant Options:** EPA approved low GWP R-454B refrigerant or energy efficient R-410A refrigerant.
- **Direct-Drive Scroll Compressors:** Hermetically sealed scroll compressors with proven performance in industrial cooling for reliable, low maintenance, and efficient operation.
- **Stainless Steel Evaporators:** High efficiency stainless steel plates with copper brazing provide maximum performance, long life, and an enhanced level of protection from harsh process conditions.
- **Integral Tank:** Integrates a chiller with a complete process pumping system and integral reservoir in one package. Provides buffer for temperature stabilization all piped, insulated and wired to the chiller control panel for a quick and easy complete chilled water system installation (chiller and tank section ship separately).
- **Evaporator Inlet Strainer:** Removes any debris present in the process fluid to prevent costly downtime and repair due to a clogged chiller evaporator.
- **Fits through Doors:** Single circuit chillers up to 80 tons (281 kW) are compact and easily fit through standard 36-inch (914 mm) wide doors for easy maneuvering into tight installation spaces.
- **Dual Circuit Manifolds:** Dual circuit chillers include evaporator manifolds and water cooled condenser units include condenser water manifolds for quick and easy installation.
- **Warranty:** 1 year parts and labor.

The compact size of the Accuchiller TSE industrial central chiller minimizes floor space while delivering exceptional cooling capacity. Its modular design allows up to 12 refrigeration circuits to be combined into a single system for over 1,000 tons (3,517 kW) of cooling capacity. The chiller's innovative high flow design assures consistent process leaving water temperatures from 20°F to 80°F (-7°C to 27°C) and as low as 5°F (3°C) differential across the process.

Accuchiller TSE Series central chiller with tank integrates a chiller with a complete process pumping system and reservoir in one package to minimize floor space. Units come fully assembled and wired, ready for quick and simple installation and include an insulated integral tank and pumping system mounted on the

same frame. With a process pump and chiller pump as standard or with an optional dual standby or dedicated standby pumps, this package provides a wide range of options and configurations to suit any process need. All pumps are prewired to the control panel to save on costly field installation. All interconnecting piping, pumps, manifolds, and reservoir are insulated to prevent condensation and improve the system efficiency.

TSE Series chillers feature Dynamic Lift Technology, which continuously calculates optimal refrigerant pressure based on operating conditions. This innovation maximizes chiller energy savings and ensures stable, smooth control of refrigerant pressure, especially under fluctuating loads and condenser inlet temperatures.

## Benefits of the TSE Series Industrial Chiller with Integral Tank Features:

### INTEGRAL TANK

An integral reservoir, with pumping system make this TSE a self-contained, complete chilled water system.

### DIRECT-DRIVE SCROLL COMPRESSORS

Hermetically sealed scroll compressors are highly efficient and reliable. Low maintenance and industrial cooling - guaranteed.

### COMPACT FOOTPRINT

Designed to fit through standard 36-inch man doors, the single circuit chillers take up little space, and are easy to maneuver.

### MODULAR EXPANDABLE SYSTEM

Easily expand a system to over 1,000 tons, using up to six chillers and 12 refrigeration circuits.

### Additional Benefits:

- **Modular Expandable System:** System design provides for system expansion to over 1,000 tons (3,517 kW) using up to six chillers and twelve refrigeration circuits.
- **UL 508A Industrial Control Panel:** Meets rigorous standards for safe, reliable operation.
- **Single or Multiple Circuit Configurations:** Dual-circuit chillers for redundancy and back up of critical processes or systems and single-circuit chillers for dedicated loads.
- **7-inch Color Touch-Screen Display:** Controls, monitors and maintains stable and reliable chiller operation.
- **CONNEX4.0 Ready Controls:** Every chiller is equipped with an Ethernet port and is fully compatible with the CONNEX4.0 plant-wide equipment control and monitoring system.

### Available Options:

- **Rotary Non-Fused Disconnect Switch:** Adds a 5 kA SCCR (Short Circuit Current Rating) rotary non-fused disconnect switch to the control panel for safe lockout of main power.
- **12-inch HMI:** Replaces the standard 7-inch screen with a 12-inch, high resolution, color screen with a built-in industrial computer to allow for remote monitoring and control using Teamviewer software installed on any remote Windows based PC or smart phone.
- **12-inch HMI and Controller:** Replaces the standard 7-inch screen with a 12-inch, high resolution, color screen with a built-in industrial computer to allow for remote monitoring and control using Teamviewer software installed on any remote Windows based PC or smart phone. This package also adds a second PLC to allow for connection of up to 15 total Thermal Care CONNEX4.0 ready devices for many ways to interact with the connected equipment such as smart phone/tablet control, configurable email and text alerts for alarms, warnings, event alerts, and data collection.
- **BACnet Communications Port:** Adds a ModBUS to BACnet gateway which is wired to a RS-485 connector on the chiller control panel.

<sup>1</sup>Allowable voltage is ± 10% from rated voltage.

<sup>2</sup>MCA is Minimum Circuit Amps, used for minimum wire size requirement.

<sup>3</sup>MOP is Maximum Overcurrent Protection, used for sizing main power protection device.

**Thermal Care is ISO 9001 Certified**  
Manufacturer reserves the right to change specification or design without notification or obligation.
